

Jersey Verano

I am currently a business major specifically studying to pursue a finance degree. After graduating I'm looking to have any type of career in finance. One career that I would like to get into right after graduating is becoming a financial analyst.

When it comes to technology I can say that I am pretty proficient. I'm very comfortable with using computers for school and everyday tasks. I use a variety of software like Microsoft Word and Google Docs for writing assignments, and Excel or Google Sheets for organizing data and assignments. When needed, I can also use other softwares and be able to work my way around it comfortably.

I'm from Oahu, Hawaii and have lived there my entire life. I chose to leave home to attend the University of Nevada, Reno because I wanted to have the opportunity of going away to the mainland to pursue a college degree since not many people from Hawaii and my family specifically got to do that. My favorite type of music to listen to is country and any type of reggae/island reggae music. I love going to the beach, hiking, and camping. My favorite thing to do is fish. I love fishing and being able to catch and cook my own food. Over the summer I was able to fish every weekend that I was home.
